

CONDITIONS FOR BACTERIA TO GROW

Bacteria need the right conditions in order to multiply.
The diagram shows some of the things bacteria need:

For each of the actions listed in the table below, fill in the requirement that is taken away and prevents the bacteria from growing.

Action	Requirement this action takes away
Wrapping in clingfilm	
Dehydrating	
Freezing	
Eating before the Use By date	
Cooking	
Refrigerating	
Pickling	
Adding salt	
Sealing in a can or jar
