Year 8

Students in Year 8 consider <u>human emotions</u> as part of the notion that "it is a quest of literature throughout the ages to describe the human condition". Students look at how writers describe the way characters feel and how they react to situations. They also consider how writers express their own viewpoints, thoughts and feelings on various topics. In doing so, they are able to use these ideas as a springboard for their own writing, generating opinions and feelings of their own, and creating engaging fictional pieces that allow them to explore the inner thoughts and moods of their own characters. Reading and writing skills becomes more developed this year, building on the foundations laid in Year 7.
